

# THERMALLOY® COATINGS

## RESTORE YOUR POWER CYLINDERS WITH THERMALLOY®

ThermAlloy® is an alloy of materials sprayed in the bore of power cylinders / liners to re-establish size and provide a long lasting wear surface. ThermAlloy® provides better wear characteristics than new, iron plated, or chromed cylinders.

### BENEFITS OF THERMALLOY®

- Harder than cast iron
- Consistent porosity through depth of coating
- Can be de-glazed at ring change
- Restore worn cylinders to standard dimensions from .100" oversize
- Not limited to specific piston ring material
- Power Cylinders can be repaired multiple times
- Line bore each cylinder on center line

### PROVEN TO PROVIDE SUPERIOR RESULTS

ThermAlloy® is the thermal spray application of complex power alloy exclusively formulated for Exline. Exline's ThermAlloy® process is PROVEN to provide superior results. We have over 2 million hours of run time with NO failures. All Exline ThermAlloy® cylinders come with our extended warranty of 18 months or 30,000 hours.

EXPERIENCE, KNOWLEDGE, & SERVICE. TRUSTED FOR OVER 140 YEARS.
