

Industrial Repair & Manufacturing Services

Exline's Industrial Repair and Manufacturing services support many industries: agriculture, mining, paper, salt, military, and heavy industrial equipment. Experience in these diverse industries enables Exline to perform a wide variety of repair and maintenance services.

Contract Parts Manufacturing

In addition to repair and manufacturing, Exline is equipped to handle production for large or short run orders for machining, grinding, heat treat and final assembly. Exline can help with your production needs when you have demand but not enough capacity.

A partial listing of our capabilities include:

- CNC and Manual Machining, Milling, and Boring
- OD Grinding
- MIG, TIG, and other Welding
- Thermal Stress Relieve
- Large and Small parts machining
- Quality Control & Inspection
- Drafting Services

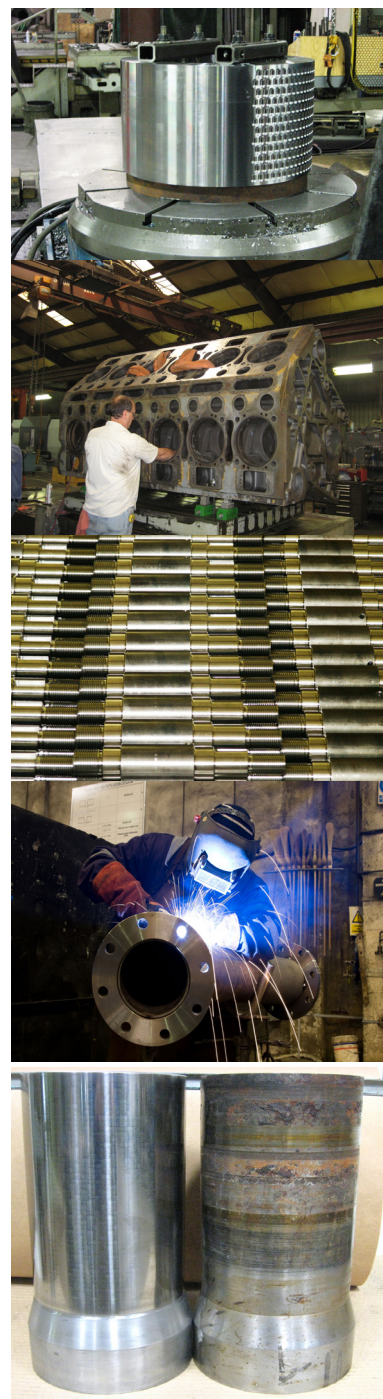

Thermex® Coatings

Our patented ThermEx® Thermal Spray Coatings improve wear resistance, add corrosion protection, and extend the service life of component parts. Exline offers a wide variety of coating systems and materials. We can restore parts to "better than new" condition. Thermex® coatings can be used to repair or enhance all these components:

- Impellers, fans, shafts, housings
- Bearings, seal areas
- Pump components

Field Services

Our Field Services Division can disassemble and repair major equipment on-site at customer locations, or provide onsite machining, overhaul, alignment, and maintenance services.
