

INDUSTRIAL REPAIR & MANUFACTURING SERVICES

EXLINE'S INDUSTRIAL REPAIR & MANUFACTURING SERVICES SUPPORT MANY INDUSTRIES: AGRICULTURE, MINING, PAPER, SALT, MILITARY, HEAVY INDUSTRIAL EQUIPMENT, AND UTILITIES

CONTRACT PARTS MANUFACTURING

- CNC and manual machining, milling, and boring
- OD Grinding
- MIG, TIG, and other Welding
- Thermal stress relieve
- Large and small parts machining
- Complete machine shop services

REPAIRS AT CUSTOMER LOCATIONS

- Our Field Services Division can disassemble and repair major equipment on-site at customer locations, or provide on-site machining, overhaul, alignment, and maintenance services

PRODUCTION SERVICES:

Exline's Industrial facility is equipped with complete shop capabilities. Exline is equipped to handle production for large or short run orders for machining, grinding, heat treat, and final assembly. Exline can help with your production needs when you have demand but not enough capacity. Our ThermEx® Thermal Spray Coatings improve wear resistance, add corrosion protection, and extend the service life of component parts. We can restore "worn" parts to "like new" condition. ThermEx® thermal spray coatings can be used to enhance a variety of parts including impellers, fans, shafts, housings, bearings, seal areas, and pump components.

EXPERIENCE, KNOWLEDGE, & SERVICE. TRUSTED FOR OVER 140 YEARS.
