- Automatic engine balancing
- CECO electronic fuel gas modulators (eFGM)
- MODBUS communication to Unit PLC
- Wireless to tablet
- Alarm on imbalance, Hi PFP, Hi standard deviation

Snapshot® Balancer

Snapshot® - Balancer
Key Features:
▪ Portable balancer for engines
▪ Ruggedized-EMI Resistant
▪ Engine cylinder pressure
▪ Spike Removal/Smoothing
▪ 2-Stroke/4-Stroke
▪ Secondary Ignition
▪ Wireless communication from data module to tablet
▪ 8-hour battery life
▪ Class I, Division 2 rating pending

Machinery Rx™

MachineryRx™ is a revolutionary new way to track engine balance across your entire organization! A simple-to-use website provides a single location for your operators and analysts to upload their engine balance results. The MachineryRx website supports automatic uploads from MMS' Snapshot Engine Balancer® along with simple form-entry for non-MMS analyzer users.
